

Section	Field Name	Type	Description
	brand_name	string	<p>The Proprietary/Trade/Brand name of the medical device as used in device labeling or in the catalog. This information may 1) be on a label attached to a durable device, 2) be on a package of a disposable device, or 3) appear in labeling materials of an implantable device. The brand name is the name that is typically registered with USPTO and have the ® and/or TM symbol.</p> <p>This is an .exact field. It has been indexed both as its exact string content, and also tokenized.</p>
	catalog_number	string	<p>The catalog, reference, or product number found on the device label or accompanying packaging to identify a particular product.</p> <p>This is an .exact field. It has been indexed both as its exact string content, and also tokenized.</p>
	commercial_distribution_end_date	date	Indicates the date the device is no longer held or offered for sale. See 21 CFR 807.3(b) for exceptions. The device may or may not still be available for purchase in the marketplace.
	commercial_distribution_status	string	<p>Indicates whether the device is in commercial distribution as defined under 21 CFR 807.3(b).</p> <p>This is an .exact field. It has been indexed both as its exact string content, and also tokenized.</p> <p>Value is one of the following  In Commercial Distribution = In Commercial Distribution  Not in Commercial Distribution = Not in Commercial Distribution</p>
	company_name	string	<p>Company name associated with the labeler DUNS Number entered in the DI Record.</p> <p>This is an .exact field. It has been indexed both as its exact string content, and also tokenized.</p>
	device_count_in_base_package	integer	Number of medical devices in the base package.
	device_description	string	Additional relevant information about the device that is not already captured as a distinct GUDID data attribute.
	has_donation_id_number	boolean	<p>The Donation Identification Number is applicable to devices that are also regulated as HCT/Ps and is a number that is assigned to each donation. This number/code is required to be part of the UDI when included on the label in order to provide the means to track the device back to its manufacturing source or otherwise allow the history of the device manufacturing, packaging, labeling, distribution and use to be determined.</p> <p>Value is one of the following  true = true  false = false</p>
	has_expiration_date	boolean	<p>The date by which the label of a device states the device must or should be used. This date is required to be part of the UDI when included on the label in order to provide the means to track the device back to its manufacturing source or otherwise allow the history of the device manufacturing, packaging, labeling, distribution and use to be determined.</p> <p>Value is one of the following  true = true  false = false</p>
	has_lot_or_batch_number	boolean	<p>The number assigned to one or more device(s) that consist of a single type, model, class, size, composition, or software version that are manufactured under essentially the same conditions and that are intended to have uniform characteristics and quality within specified limits. This number is required to be part of the UDI when included on the label in order to provide the means to track the device back to its manufacturing source or otherwise allow the history of the device manufacturing, packaging, labeling, distribution and use to be determined.</p> <p>Value is one of the following  true = true  false = false</p>
	has_manufacturing_date	boolean	<p>The date on which a device is manufactured. This date is required to be part of the UDI when included on the label in order to provide the means to track the device back to its manufacturing source or otherwise allow the history of the device manufacturing, packaging, labeling, distribution and use to be determined.</p> <p>Value is one of the following  true = true  false = false</p>

has_serial_number	boolean	<p>The number that allows for the identification of a device, indicating its position within a series. This number is required to be part of the UDI when included on the label in order to provide the means to track the device back to its manufacturing source or otherwise allow the history of the device manufacturing, packaging, labeling, distribution and use to be determined.</p> <p>Value is one of the following true = true false = false</p>
is_combination_product	boolean	<p>Indicates that the product is comprised of two or more regulated products that are physically, chemically, or otherwise combined or mixed and produced as a single entity; packaged together as a single package; or packaged separately for the intended use together as defined under 21 CFR 3.2(e). At least one of the products in the combination product must be a device in this case.</p> <p>Value is one of the following true = true false = false</p>
is_direct_marking_exempt	boolean	<p>The device is exempt from Direct Marking requirements under 21 CFR 801.45.</p> <p>Value is one of the following true = true false = false</p>
is_hct_p	boolean	<p>Indicates that the product contains or consists of human cells or tissues that are intended for implantation, transplantation, infusion, or transfer into a human recipient as defined under 21 CFR 1271.3.</p> <p>Value is one of the following true = true false = false</p>
is_kit	boolean	<p>Indicates that the device is a convenience, combination, in vitro diagnostic (IVD), or medical procedure kit. Kits are a collection of products, including medical devices, that are packaged together to achieve a common intended use and are being distributed as a medical device.</p> <p>Value is one of the following true = true false = false</p>
is_labeled_as_no_nrl	boolean	<p>Indicates that natural rubber latex was not used as materials in the manufacture of the medical product and container and the device labeling contains this information. Only applicable to devices not subject to the requirements under 21 CFR 801.437. Not all medical products that are NOT made with natural rubber latex will be marked.</p> <p>Value is one of the following true = true false = false</p>
is_labeled_as_nrl	boolean	<p>Indicates that the device or packaging contains natural rubber that contacts humans as described under 21 CFR 801.437. The value true indicates that the device label or packaging contains one of the following statements: (1) 'Caution: This Product Contains Natural Rubber Latex Which May Cause Allergic Reactions', (2) 'This Product Contains Dry Natural Rubber', (3) 'Caution: The Packaging of This Product Contains Natural Rubber Latex Which May Cause Allergic Reactions' or (4) 'The Packaging of This Product Contains Dry Natural Rubber'.</p> <p>Value is one of the following true = true false = false</p>
is_otc	boolean	<p>Indicates that the device does not require a prescription to use and can be purchased over the counter.</p> <p>Value is one of the following true = true false = false</p>
is_pm_exempt	boolean	<p>Indicates whether the device is exempt from premarket notification requirements.</p> <p>Value is one of the following true = true false = false</p>

	is_rx	boolean	<p>Indicates whether the device requires a prescription.</p> <p>Value is one of the following true = true false = false</p>
	is_single_use	boolean	<p>Indicates that the device is intended for one use or on a single patient during a single procedure.</p> <p>Value is one of the following true = true false = false</p>
	mri_safety	string	<p>Indicates the MRI Safety Information, if any, that is present in the device labeling. Please see the ASTM F2503-13 standard for more information.</p> <p>This is an .exact field. It has been indexed both as its exact string content, and also tokenized.</p> <p>Value is one of the following MR Safe = MR Safe MR Unsafe = MR Unsafe MR Conditional = MR Conditional Labeling does not contain MRI Safety Information = Labeling does not contain MRI Safety Information</p>
	publish_date	date	Indicates the date the DI Record gets published and is available via Public Search.
	record_status	string	<p>Indicates the status of the DI Record.</p> <p>Value is one of the following Published = Published Unpublished = Unpublished Deactivated = Deactivated</p>
	sterilization.is_sterile	boolean	<p>Indicates the medical device is free from viable microorganisms. See ISO/TS 11139.</p> <p>Value is one of the following true = true false = false</p>
	sterilization.is_sterilization_prior_use	boolean	<p>Indicates that the device requires sterilization prior to use.</p> <p>Value is one of the following true = true false = false</p>
	sterilization.sterilization_methods	string	<p>Indicates the method(s) of sterilization that can be used for this device.</p> <p>Value is one of the following Chlorine Dioxide = Chlorine Dioxide Dry Heat Sterilization = Dry Heat Sterilization Ethylene Oxide = Ethylene Oxide High Intensity Light or Pulse Light = High Intensity Light or Pulse Light High-level Disinfectant = High-level Disinfectant Hydrogen Peroxide = Hydrogen Peroxide Liquid Chemical = Liquid Chemical Microwave Radiation = Microwave Radiation Moist Heat or Steam Sterilization = Moist Heat or Steam Sterilization Nitrogen Dioxide = Nitrogen Dioxide Ozone = Ozone Peracetic Acid = Peracetic Acid Radiation Sterilization = Radiation Sterilization Sound Waves = Sound Waves Supercritical Carbon Dioxide = Supercritical Carbon Dioxide Ultraviolet Light = Ultraviolet Light</p>

	product_codes.code	string	A three-letter identifier assigned to a device category  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
	product_codes.name	string	Name associated with the three-letter Product Code
	version_or_model_number	string	The version or model found on the device label or accompanying packaging used to identify a category or design of a device. The version or model identifies all devices that have specifications, performance, size, and composition within limits set by the labeler.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Device identifiers	identifiers.id	string	Registration status code.  Value is one of the following 1 = Active 5 = Active awaiting assignment of registration number
Device identifiers	identifiers.issuing_agency	string	Identifies whether facility is an initial importer.  Value is one of the following Y = Yes N = No
Device identifiers	identifiers.package_discontinue_date	date	Year that registration expires (expires 12/31 of that year).
Device identifiers	identifiers.package_status	string	Facility or US agent address line 1.
Device identifiers	identifiers.package_type	string	Facility or US agent address line 2.
Device identifiers	identifiers.quantity_per_package	integer	Facility or US agent city.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Device identifiers	identifiers.type	string	Facility or US agent US state or foreign state or province.
Device identifiers	identifiers.unit_of_use_id	string	Number of devices noted in the adverse event report. Almost always 1. May be empty if report_source_code contains Voluntary report.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Customer Contact	customer_contacts.email	string	Facility or US agent Zip code.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Customer Contact	customer_contacts.phone	string	Name associated with the facility or US agent.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Device Size	device_sizes.text	string	Facility foreign postal code.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Device Size	device_sizes.type	string	Facility identifier assigned to facility by the FDA Office of Regulatory Affairs.
Device Size	device_sizes.value	string	Facility identifier assigned to facility by the FDA Office of Regulatory Affairs.
Device Size	device_sizes.unit	string	Number assigned to Owner Operator by CDRH.
GMDN Terms	gmdn_terms.name	string	Firm name of owner operator.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
GMDN Terms	gmdn_terms.definition	string	Official correspondent first name.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Storage and Handling	storage.high.value	string	Official correspondent last name.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Storage and Handling	stoarage.high.unit	string	Official correspondent middle initial.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Storage and Handling	storage.low.value	string	Official correspondent phone number.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.eprocessed and reused.

Storage and Handling	storage.low.unit	string	Official correspondent company name (if different from owner operator company name).  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
Storage and Handling	storage.special_conditions	string	First line of address for owner operator.
Storage and Handling	storage.type	string	Second line of address for owner operator.
OpenFDA fields	device_class	string	A risk based classification system for all medical devices ((Federal Food, Drug, and Cosmetic Act, section 513)  Value is one of the following 1 = Class I (low to moderate risk): general controls 2 = Class II (moderate to high risk): general controls and special controls 3 = Class III (high risk): general controls and Premarket Approval (PMA) U = Unclassified N = Not classified F = HDE
OpenFDA fields	device name	string	This is the proprietary name, or trade name, of the cleared device.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
OpenFDA fields	fei_number	array of strings	Facility identifier assigned to facility by the FDA Office of Regulatory Affairs.
OpenFDA fields	medical_specialty_description	string	Regulation Medical Specialty is assigned based on the regulation (e.g. 21 CFR Part 888 is Orthopedic Devices) which is why Class 3 devices lack the "Regulation Medical Specialty" field.  This is an .exact field. It has been indexed both as its exact string content, and also tokenized.
OpenFDA fields	regulation_number	array of strings	The classification regulation in the Code of Federal Regulations (CFR) under which the device is identified, described, and formally classified (Code of Federal regulations Title 21, 862.00 through 892.00). The classification regulation covers various aspects of design, clinical evaluation, manufacturing, packaging, labeling, and postmarket surveillance of the specific medical device.
